Cole-Parmer® Block Heater, 2 Block, Digital - BH-200D-2, BH-200D-2-HT

Cole-Parmer® BH-200D-2 and BH-200D-2-HT accommodate two blocks with independent temperature controls for precise and uniform heating of tubes of different sizes.

Fully interchangeable Aluminium blocks, drilled to precisely fit test tubes, microcentriguge tubes, cuvettes, and microtitre plates, are heated from below for accurate and stable temperature management. The BH-200D-2 and BH-200D-2-HT offer a temperature range of ambient +8°C to +130°C, and ambient +8°C to +200°C respectively, and heats to 100°C in less than 12 minutes. The two blocks offer independent control, allowing you to work at two different temperature points simultaneously.

The simple digital control allows intuitive temperature management; the Power light illuminates as soon as the unit is switched on, the digital display shows current temperature, and the Heat light comes on when the blocks are heating up to their set temperature. The safety Hot warning light flashes whenever the blocks are above 50°C, even if unit is switched off.
